## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 9.

Specifically regarding claims 1 and 9, Imanari teaches the state of the art of an improved cam ring structure for use in a lens barrel in fig. 2, 4 and 5, including concentric rings (5 and 6), cam rib (5c) and followers (6b and 6c).

But, Imanari fails to explicitly teach the central positions of said pair of cam followers are offset from each other in a circumferential direction, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
